Unique Flat-type + LCD Touch Screen Networking Switches Innovative Design to Optimize Operation

Smart Ethernet Switch Solution to SMEs and Large-scale Networks

PLANET has developed innovative switches featuring an LCD touch screen and a unique flat-type design to enhance operational efficiency across all types of networking infrastructures, including :

- Building/Home automation network
- Internet of Things (IoT)
- IP surveillance
- Wireless LAN

Unique Flat-type Design

To facilitate the network deployment in any space-limited locations like wall enclosure or electric box found in buildings or outdoors, PLANET developed industrial Ethernet switches in a compact flat-type design. The products can be installed by fixed wall mounting, magnetic wall mounting or DIN rail, thereby making its usability more flexible.

Flat Design

Magnetic Installation

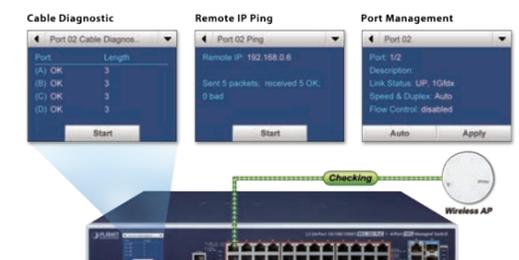

Front Access

Intuitive LCD Control

The Ethernet Switch features an intuitive touch panel that facilitates Ethernet PoE PD management and enhances management efficiency in large-scale networks, such as enterprises, hotels, shopping malls, government buildings, and other public areas.

Other features :

- IP address, VLAN and QoS configuration
- PoE management and status
- Port management and status, and SFP information
- Troubleshooting: cable diagnostic and remote IP ping
- Maintenance: reboot, factory default and save configuration
